- **Working Principles of an Automatic Car Parking Toll Gate System Using Arduino:**   September, 2024

  Goal: Developed a functional automatic toll gate system to enhance efficiency and automation in car parking management using Arduino-based technology.

  Description: Implemented an ultrasonic sensor to detect vehicles, a turbo motor to operate the gate, and integrated components like a breadboard and Arduino Uno for system control. Designed the system to respond dynamically to real-time input, ensuring smooth operation and accurate vehicle detection

  Learning Outcome: Acquired hands-on experience in Arduino programming, deepened understanding of sensor-based automation.

CERTIFICATES

- Effective Communication by SKILLERA   October, 2024
- Certificate of participation in Cod-A-FestX 2.0 hackathon by InnovXus   September, 2024
- Python Fundamentals for beginners by Great Learning   September, 2024
